# Construction Management Graduate Adrian Castillo Praises Everglades Program

**G**rowing up in a "BIG" city like New York, experience counts a great deal in the construction industry. Working in the field of construction for nearly 12 years gave me the edge that put me above the rest, but opportunities close quickly if you don't have a degree.

The Construction Management program at Everglades University gave me the confidence to work with other professionals in the field and gave me the necessary tools, ability and knowledge to become a better, more productive Construction Project Manager. The degree of experience the Everglades faculty brought to the program was excellent and provided best-practice sharing with my classmates.

The Everglades program allowed me to finish my degree while working full time. One of my goals was to continue

working while I attended school; after all, not many universities offer this unique program that fits my interests as closely as the Everglades Bachelor of Science in Construction Management. In today's working environment where so much emphasis is placed on a degree, I strongly encourage all to take this program to round out their resume.

Everglades, it was a pleasure finishing this voyage on time and on budget! The owner is satisfied. – *Adrian Castillo, 2010 Graduate, Sarasota Campus*
