Notable Figures with Autism

Some of the most well-known people from history who are famous today have autism spectrum disorder (ASD). These include famous scientists, musicians, entrepreneurs, entertainers, and activists!

Albert Einstein- Scientist Albert Einstein (1879-1955) was a German-born physicist. He was one of the greatest scientists of all time. He invented the first laser. Einstein also developed the special and general theories of relativity ($E=mc^2$) and won the Nobel Prize for Physics in 1921 for his explanation of the photoelectric effect.

Eminem, whose real name is Marshall Bruce Mathers III, is a rapper, songwriter, record producer, record executive and actor. He's known as being one of the best-selling and most talented artists of all time. In interviews, Eminem says he remembers faking sick to stay home from school, where he says he was shy and awkward.

Satoshi Tajiri –(creator of Pokémon), As a child, Satoshi loved collecting bugs. He's said before that this love of bug collecting is what inspired him to create Pokemon – he wanted a way to give children the same joy he had while collecting bugs when playing his video games. Many people on the autism spectrum enjoy collecting, sorting, and categorizing different things.

STUDENT *Spotlight*

My experience at Everglades University has been transformative. The education I've received has not only deepened my understanding of construction management but also given me the confidence to take on projects and explore innovative solutions in the industry.

DAIDRE S.

Student-Bachelor of Science
in Construction Management

April 1, 2025 April Fools Day

This Autism Awareness Month, we celebrate the unique perspectives and strengths that individuals with autism bring to the world. At our online college, we are committed to creating a supportive, inclusive environment where every student is empowered to reach their fullest potential. We believe that diversity in thinking, learning, and being is what makes our community stronger. Together, we can break down barriers, encourage self-expression, and embrace the extraordinary talents that make each person's journey special. Let's continue to build a world of understanding, acceptance, and limitless opportunities for all.
